Eternal University, Baru Sahib (Computer Science)

PROJECTS

1. Magic 8 ball using Flutter:
It is a small mobile app made in flutter which shows question and by tapping on the ball shows yes or no answer.

2. Student Study Portal using Python:
It is a web application in which student can login into their account and add notes, do their homework and many more things.

3. 3D Grass using Blender:
It is a 3D model of grass.

4. Weather Forecast app in Figma:
It shows the layout of an app with some gradient affect.
